- You'll find value, whether you are an individual, community leader, in government, a landowner, property owner, business, or nonprofit.
- We're convening the players who will share their success stories and give you the how-to's, case examples, and ways to fund your project.
- Keynotes, discussions, panel presentations, evening social, vendor displays.
- Come, be a part of it. Your support demonstrates your commitment to this community and your quality of life.
- Waste, Energy, Transportation, and Efficiency topics will be covered for multiple sectors.

Testimonials

"I really enjoyed your talk. Our small actions definitely add up!"

Lee Gonzales

"Thank you for the conference. Really great discussions"

Brian Barry

"The 2018 conference was an excellent source of best practice and innovative ideas to help curb greenhouse emissions for individuals, businesses and government bodies. It was great to not only hear successful examples from across Oregon, but to also be able to take home practical steps for reducing emissions. The broad range of topics such as greening your 401k, securing funding for your projects or navigating energy scores in the real estate market ensured everyone left with something to think about."

Kevin Rooney

"The 2016 350Deschutes conference was a powerful meeting of like-minded individuals, NGOs, consultants, and municipal representatives. The discussions were passionate, full of useful information, and structured for action. If you are concerned about the health of our planet and its residents, you don't want to miss this year's meeting. Plan on staying for the entire meeting, you will not regret it."

Eileen Obermiller, Principal, Dappled Earth, LLC

Potential Topics

- Electric Vehicles: incentives and infrastructure
- Community, residential, and commercial solar projects
- Alternative Fuels: Benefits and Opportunities
- Success stories from a variety of sectors and projects
